

# IPO Note OBSC Perfection Limited

Recommendation: APPLY!

#### Company Background -

- Incorporation: OBSC Perfection Limited was originally incorporated in the year 2017. The registered office is located at South Delhi, India.
- Business Model: The company is a precision metal component manufacturer offering a diversified suite of precision engineering products.
- Industries Served: The company primarily cater to top original equipment manufacturers ("OEMs"). In non-automotive sector, company caters to manufacturers of Defence, Marine & Telecommunication Infrastructure industries.
- The company had 91 permanent employees, and 644 contract labours as of September 30, 2024.

# **Objects of the Issue -**

- Funding capital expenditure requirements towards the purchase of machinery for the existing manufacturing facilities.
- Funding Working Capital Requirements.
- General Corporate Purposes.

# Promoters Name -

Saksham Leekha, Ashwani Leekha, Sanjeev Verma, Rajni Verma, Asha Narang, Sandeep Narang, Richard Blum, Adrianne Blum, Pascal Blum, Simon Blum, Omega Bright Steel and Components Private Limited, Omega Bright Steel Private Limited, Ess U Enterprises Private Limited and Bluwat Ag.

# Rationale for recommendation -

- ✓ The company's P/E is fairly priced.
- $\checkmark\,$  The company has had positive operating cash flow.
- $\checkmark\,$  The company has good objectives.
- ✓ The management overview is satisfactory.
- ✓ The company has good strategies.
- ✓ The company is a part of Anglian Omega Group.
- $\checkmark$  The company has a good geographical presence.
- ✓ The company is expanding its capacity.
- The company has seen a consistency in the growth of its top line and bottom line over the years.
- The company has performed better than its peers in the aspect of bottom-line margins.

# IPO Note – OBSC Perfection Limited Recommendation: APPLY

# **Business Overview -**

OBSC Perfection Limited was incorporated in the year 2017. The company is a precision metal component manufacturer offering a diversified suite of precision engineering products. The company primarily cater to top original equipment manufacturers ("OEMs"). The company also has an international presence through export sales.

#### Product Portfolio -

The company manufactures a wide range of precision metal components including but not limited to cut blanks, shafts / spline shafts, torsion rods, piston rods, rack bar semi-finished, pinion, drive shafts, gear shifters, cable end fittings, sensor boss, sleeves, push plate, hubs, housing – brass and aluminium, fork bolt, fasteners, connectors, ball pin, ball pin housing, flange, male female ring, dozing adapter, housing for a diversified base of customers. As on Oct 16, 2024, they have a product portfolio of 24 products.

**Turned Fitting** 

## **Piston Rods**

Nut Fasteners

#### Order Book -

The company fulfils the customer orders through an order book and nomination letter basis. The company currently has **Rs. 2,805.41 lakhs**. The commercial production for these nominated products may begin in 6 months to 3 years down the line and currently has received nomination letters for **Rs. 35,993 lakhs**.

#### **Industries Served -**

#### **Manufacturing Facility -**

The company has 4 manufacturing facilities. Unit I is located Nanekarwadi Pune, Unit II is located in Chakan Pune, Unit III is located in Chennai and Unit IV is located in Pune.

**Unit I** - Machined Components – 88.7%, 88.7%, 88.7% for three financial years from 2022 - 2024

**Uni II** - Investment Casting – 60%, and 60% for FY 2023 and 2024 respectively.

Machined Components – 90%, and 83% for FY 2023 and 2024 respectively.

**Unit III -** Machined Components – 72% for FY 2024.

**Unit IV** – Commercial Production is yet to begin.

#### Anglian Omega Group -

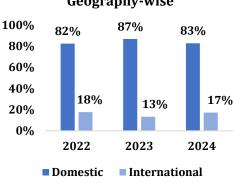

The company is a part of Anglian Omega Group which began operations in 1969. Since then, the group has expanded and diversified into various sectors, including electric mobility, high-tech auto components, infrastructure, supply chain management services, trading, and sports.

| Industry  | Automotive         | Defence    | Marine           | Telecommunication |

#### Geography-wise

#### Net Proceeds Utilization -

The company is raising total gross proceeds of Rs. 66.02 Cr. Net Proceeds will be utilised as per the table provided below -

| Particulars  | Amount To Be Utilized          |
|--|--------------------------------|
| Funding capital expenditure requirements towards the purchase of | Rs. 1,542.00 Lakhs             |
| machinery for the existing manufacturing facility ("Unit III")   |                                |
| Funding capital expenditure requirements towards purchase of     | Rs. 1,517.00 Lakhs             |
| machinery for the existing manufacturing facility ("Unit IV")    |                                |
| Funding working capital requirements                             | Rs. 1,666.00 Lakhs             |
| General corporate purpose  | Not more than 25% of the Gross |
|  | Proceeds                       |

The company is purchasing various types of equipment in the Unit III Facility (i) CNC Lathe machine; (ii) CNC Vertical Machining Center; (iii) CNC Turnmill Centre; and (iv) CNC Centreless Grinding Machine. The existing installed capacity is 18,16,000 nos and proposed capacity will be 35,00,000 Nos. and the total capacity will be 53,16,000 Nos.

The company is investing in new machinery for Unit IV and the civil and structural work is completed and the company is utilising its net proceeds for purchasing the necessary machinery to commence commercial production of precision engineering components.

#### Competition -

**Market Competition: High,** the market is fragmented with both organized and unorganized players competing at national and regional levels, intensifying the rivalry.

**Barriers to entry: Moderate,** Low entry barriers and the potential for new competitors, especially in unorganized sectors, heighten the risk of new entrants.

**Bargaining Power of Suppliers: Moderate,** the power of suppliers is balanced as access to skilled labor and raw materials is critical, but competitors can switch to other suppliers if needed.

**Bargaining Power of Buyers: High,** Buyers have strong bargaining power due to the availability of numerous competitors and similar product offerings, increasing pricing pressure.

**Threat of Substitutes: Low,** there are limited direct substitutes for precision metal components, but alternative materials or processes may offer competition in specific use cases.

#### Strategies -

- The company aims to continue investing in the existing manufacturing facilities to build new capabilities to support the production of the portfolio of products.
- The company aims to strengthen its core capabilities by expanding its production capacity.
- The company intends to establish a manufacturing facility in Sanand, Gujarat, a prominent auto hub in India.
- The company has recently ventured into manufacturing precision clamping solutions and manufacturing and distributing speciality collets and guide bushes specifically designed for Swiss turning machines, multi-spindle lathes, and other equipment requiring high-performance components and bar clamping mechanisms.
- The company plans to launch the above products through its brand AlphaSeiki globally through a well-established network of dealers in Europe and the USA,

#### **Risk Factors -**

The company's top 10 customers contributed 57.13%, 65.54%, 60.94% and 61.10% in the period ended August 31, 2024, and the Fiscal 2024, 2023 and 2022 respectively.

The company, directors, and promoters have certain litigations pending amounting to Rs. 41.7 lakhs.

#### Indian Auto Components Sector -

#### Market Size -

India's auto components industry's market share has significantly expanded, led by increasing demand for automobiles by the growing middle class and exports globally. Due to the Oz670 growth in demand for Indian auto components, several Indian and international players have entered the industry. India's auto component industry is broadly classified into organised and unorganised sectors. While the unorganised sector consists of low-valued items and mostly serves the aftermarket category, the organised sector serves OEMs and includes highvalue precision instruments.

The automobile component industry turnover stood at Rs. 6.14 lakh crore (US\$ 74.1 billion) during FY24, registering a revenue growth of 9.8% as compared to FY23. Domestic OEM supplies contributed ~54% to the industry's turnover, followed by domestic aftermarket (~10%) and exports (~18%), in FY24.The component sales to OEMs in the domestic market grew by 8.9% to Rs. 5.18 lakh crore (US\$ 62.4 billion). The aftermarket for auto components grew by 10.0% during FY24 reaching Rs. 9.38 lakh crore (US\$ 11.3 billion). Over FY16 to FY24, the automotive components industry registered a CAGR of 8.63%, reaching US\$ 74.1 billion in FY24.

# 15.2 14.5 13.3 19.0 19.0 21.2 30.0 FY19 FY20 FY21 FY22 FY23 FY24 FY26

Value of Auto Component Export (US\$ billion)

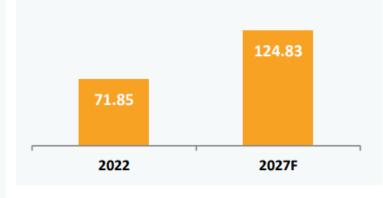

#### **Indian Engineering Sector -**

The engineering sector is the largest of the industrial sectors in India. It accounts for 27% of the total factories in the industrial sector and represents 63% of the overall foreign collaborations. Demand for engineering sector services is being driven by capacity expansion in industries like infrastructure, electricity, mining, oil and gas, refinery, steel, automobiles, and consumer durables.

Imports of Electrical Machinery in India increased to US\$ 12.30 billion in FY24. The Indian electrical equipment industry comprises of two broad segments, Generation equipment (boilers, turbines, generators) and Transmission & Distribution (T&D) and allied equipment like transformers, cables, transmission lines, etc. The sector contributes about 8% to the manufacturing sector in terms of value, and 1.5% to overall GDP. Incentives for capacity addition in power generation will further increase the demand for electrical machinery.

The Indian industrial fasteners market was valued at US\$ 9,064 million in 2022 and is projected to reach US\$ 17,868 million by 2030, registering a CAGR of 7.9% during the forecast period (2023-2030)

The company has handled 17 mandates in the past three years (including the current year).

\*CMP for the above-mentioned companies is taken as of 21<sup>st</sup> Oct 2024.

As per the offer document, the above-mentioned mandates all have opened at a premium on the listing day.

OBSC Perfection Limited has been in the industry since 2017 and has good experience in the industry. The management overview of the company is satisfactory.

The P/E on a post-IPO basis is around 20.02 times which makes it fairly priced by looking at the performance of the company and compared to its peer companies.

The company operates in a growing industry, with products that serve diverse applications across various sectors. This broad market reach provides stability and consistent demand, helping to safeguard revenue streams. Additionally, the company's strong order book and nomination letter highlight its promising potential for future growth. These factors suggest a positive outlook for the company's top-line performance, positioning it well for business expansion and improved profitability.

Furthermore, the company is actively working to expand its manufacturing capacity, addressing current high utilization rates. This proactive approach will allow it to meet increasing demand. One of its notable strategies includes venturing into the production of precision clamping solutions and speciality tools under the AlphaSeiki brand, which is expected to have a global launch. Supported by the Anglian Omega Group, a conglomerate with a presence in multiple industries, the company is well-equipped to leverage new opportunities and drive sustainable growth.

Thus, we have an **<u>APPLY</u>** opinion of this IPO.
